

Interior Painting Oshawa

Advantage is here to take on a wide array of your interior painting needs. We will paint one bedroom or your entire house. No matter what the project you can expect a quality paint job from our friendly knowledgeable team. A quality paint job consists of many things in our mind and this section will take you through our process.

We remove all electrical covers and light switch plates and anything else you need removed from the walls, move all furniture (but do ask you remove any valuable knick knacks prior to this) and cover in plastic as needed. We dropsheet areas of the floor where needed and begin with the prep work aspect of the job. The prep work for an interior job can consist of many different things, but our standard service is to fill all nail holes, patch any dents, dings and imperfections, repair any minor drywall repairs or cracks, and then prime anywhere significant prep was required. If you are curious how to properly do any of these types of prep work yourself please visit our How to section where you can see videos and articles on related topics.

Once the prep work is completed to the Advantage standards, we begin the actual painting of your home. Using top quality supplies makes the project commence more efficiently, and also adds to the quality of the overall job. For this reason we use a wide array of great products. Spending more on our supplies is definitely worth the investment as the trade off is longer lasting products, better quality and we are able to get the work done faster. To learn more about the various products the Advantage team is supplied with look under products in our How To section.

As far as the actual painting, this is generally the easy part once all of the prep work is done, furniture out of the way and its time to paint! Our interior work is typically a mix of residential and commercial, and we also do some new build projects involving spraying. When it comes to interior painting we cut in and roll out walls with a minimum of 2 coats 99% of the time. If a

customer wants the same colour we can do one coat but typically recommend 2 coats for optimum coverage and durability.

Advantage College Painters

The Advantage team would like to welcome ALEX DRAKE to our growing team of qualified house painters! Alex with his partner Ashley will be running student painter operations in Abbotsford, and Chilliwack British Columbia. Alex brings with him 3 years of painting experience under one of our largest full time operators between his studies. Stay tuned for an updated list of all of our College Painter Operators in the coming weeks! Similar to the business model of our professional painting division, our college painter or student painting division is composed of a small number of handpicked operators.

By keeping our numbers exclusive we keep quality at an extremely high level, and only have university and college students operating who live by our values. We recognize there are many jobs in the painting industry that when properly trained, students can handle, and in the case of our operators, handle very well.

All of our student painters are full time university or college students and run full time painting businesses with Advantage in the summer to help offset the tuition. All of our operators learn from our professional painters, and receive tremendous support over the summer. We have qualified student operators fully trained to take on a variety of painting services. We are confident in our student painters ability to take on a wide array of jobs, and promise the highest quality painting of any of the student painting companies.

By choosing to take on far less operators than many of our competitors we have far more control over the final product, ensuring a superior job and happy customers throughout the summer!

Our student division also covers a huge area including anything within 2 hours of: the entire Greater Toronto Area, Oakville, Barrie extending throughout the Muskokas and cottage country to Peterborough and the Kawarthas as far as Minden and Haliburton, and even as far east as Kanata, Nepean and Ottawa, and now Abbotsford, British Columbia!

Advantage House Painters Inc

Our full time division is composed of a number of experienced painting professionals who all ran their own painting businesses prior to joining together, and creating Advantage House Painters Inc. As a result we are now able to cover even more territory, and can pull from our various operators when tight deadlines or large painting projects arise.

The beauty of Advantage House Painters Inc. is although we are now a larger company and can produce work just about anywhere within 3 hours of the Greater Toronto Area, and 2 hours within Ottawa, we are still a small company at heart. The Advantage business model is simple to ensure we continue to make our customers extremely happy. We have a small group of operators all running businesses with anywhere from 4-8 employees. By keeping our number of operators exclusive we ensure everyone operates with the same core values and continue to provide quality service at fair prices. Overall, our operators have a very hands-on approach to limit confusion that can occur when too many middlemen exist.
